

Transform Your Machine!

The Maxflow Hotbox is an electrically-powered diesel boiler, it connects to almost all cold water pressure washers to effectively turn them into a hot pressure washer, it can heat cold water up to 150 °C.

It is suited to many applications, particularly in agriculture, livestock industries. It can also be used to fill hot tubs, swimming pools, etc. The hot water enables more effective cleaning, given that at least 15 bar is provided.

The Hotbox is designed with a 3/8" coil, a stainless-steel cover and steel base to ensure durability, and complete with 17L fuel tank with level sensor. The diesel pump is directly coupled to the fan from the fan motor housing.

The Hotbox promises high performance with low power consumption operating from a standard 230v socket and

Model - HOTBOX25

Part No.	Power Supply	Max. Litres Per Min	Max. Bar	Max. PSI	KG
HOTBOX25	230v	25	250	3600	130

i Recommended Application: Commercial

- Easy adaption to any cold water machine
- Adjustable thermostat
- Automatic stop
- Flow switch activation
- Safety valve
- On-board diesel tank
- Robust industrial frame design
- Easy to manoeuvre
